

JHERVIN JIMENEZ

JUNIOR DEVELOPER & AI SYSTEMS
BUILDER

SUMMARY

Junior Developer and AI-native systems builder specializing in workflow automation, full-stack development, and machine learning integration. Proven ability to bridge the gap between custom code and no-code tools to architect production-ready systems. Highly autonomous executor experienced in deploying LLM agents, API routing, and secure database architecture.

RELEVANT EXPERIENCE & PROJECTS

Junior Developer | Camp Connection | (Jan 2026 – Present)

- Actively shipping features and resolving technical bottlenecks in a remote, asynchronous environment.
- Maintaining clean code structures and executing backend logic to support core business operations.

Creator: Jhervis (AI Digital Companion) | 2025

- Built a custom, interactive AI digital companion from the ground up using Python, LiveKit, Google Gemini, and React.
- Designed complex persona definitions, prompt instruction sets, and LLM behavior guardrails to ensure consistent, context-aware responses.

Developer: Alumni Employability Prediction System | 2026

- Integrated ARIMA, Linear Regression, and Random Forest machine learning models into a web-based platform to predict higher education employability outcomes.

Project Lead: SafePasig.AI | 2025

- Spearheaded an AI-driven community security system, utilizing YOLOv8 computer vision models to address local security needs.

EDUCATION

PAMANTASAN NG LUNGSOD NG PASIG | 2023 - PRESENT

Bachelor of Science in Information Technology (BSIT)

- Achievements: Consistent President's Lister

ARELLANO UNIVERSITY PLARIDEL CAMPUS | 2019 - 2021

Senior High School (ICT Strand)

- Achievements: Graduated With High Honor , Best in Research (2021).

SKILLS

- AI & Automation:** n8n (self-hosted), LLM API Integration (Claude/Gemini), Prompt Architecture, LiveKit Voice Agents, Generative AI Evaluation.
- Programming & Frontend:** React, Node.js, Python, Java, VB.Net, C++, JavaScript.
- Backend & Infrastructure:** Firebase, Cloud Firestore, MySQL, REST APIs, OAuth2.0, Webhooks, Mac/Linux server basics (Docker, Tailscale).
- Machine Learning:** ARIMA, Linear Regression, Random Forest.
- Design:** Figma, Modern Minimalist / Glassmorphism UI.
